

Field, incident to the production of oil. Some of Mr. Kidd's suggestions were incorporated into the changes of the Order and Finding of Facts. Paragraphs 4 and 5 of the original Order were reinstated and other changes were approved by the Board.

SAND AND GRAVEL OPERATIONS

Sand and gravel operation regulation was discussed briefly by the Board. Representative Genevieve Atwood is handling it on the Legislative level, and at least one County (Davis) is attempting to regulate these operations by zoning. Chariman Cardon mentioned that a decision could not be made until we hear from Genevieve Atwood and the Legislature on this matter.

RIO ALGOM OBJECTION

ACT-037-001

The discussion this matter of objection to Rio Algom's Humeca Uranium Mill was directed toward the fact that this Division has no authority over the settlement of property claims, therefore the objection to said mill has no validity under the Mined Land Reclamation Act. If no factual evidence is presented to the Board on the reclamation plan itself, then this objection must be considered a civil cause of action. Therefore, the Board unanimously approved the reclamation plan of Rio Algom, Humeca Uranium Mill.

RECLAMATION BONDS

Bond requirements were discussed by the Board as to whether or not a "fixed" amount is necessary because if the surety is initially set too high, a business can be put out of operation. The question was presented as to whether or not all operations should be monitored and planned for a review every five years with the idea the Board might have to decrease or increase the amount; dependent upon whether or not the mining operation has increased or decreased. The Board then proceeded to grant approval on the following reclamation bonds:
